

New Features Incorporated into MITS 5.1 – Published 10/01/2026

ID	MITS Type	Feature	Description
New MITS Class			
1.	New Class Enum value change	Add “General” Class as a New Class	Create a new class named “General” that can be used for multiple purposes and covers items that don’t pertain to one of the other specific classes; the primary initial purposed of this class are: 1.Facilitate the transmission and display of property-wide “Disclaimers” and “Marketing Specials” ChargeOfferItems under this class are exempt from the MVA requirements.
2.	New Class Enum value change	Add “Waiver” as a new class	Create a new class named “Waiver”. Definition: A fee or charge to be exempted from another required fee or charge or some other policy requirement.
Schema Changes			
1.	Schema change	Add “Disclaimers”	Modify the ChargeOfferItem model to add a “Disclaimers” list that allows for 1 or more text strings to be transmitted and displayed. Length of characters in each text string is limited to 5000 characters
2.	Schema change	Add “Specials”	Modify the ChargeOfferItem model to add a “Specials” list that allows for 1 or more text strings related to marketing or special offers. Length of characters in each text string is limited to 5000 characters
3.	Schema change	Add “Third Party Provider”	Boolean. This field is used on the ChargeOfferItem to indicate that a charge is paid to a third party rather than to the property directly.
4.	Guidance	Charge Offer amounts and Limit calculation sequencing	Calculations must iterate across all items until all limits are satisfied. Since calculations for charge offer items can be based on multiple limits and other items, which themselves can be modified by their own applicable limits, calculations need to be performed in a defined order and iterate across all items until all limits are satisfied.
